Pro Tip

Make custom printed LINK-O-LOON®s by double stuffing a printed round into a clear LINK-O-LOON®. Easy and cute!

INTRODUCTION

Foil and latex balloons create more interest and visual value to a simple string-of-pearl technique arch. With HI-FLOAT, this lighter than air design also lasts and lasts.

APPLICATIONS

- Entrance décor
- Over a buffet or treat table
- Backdrop
- Display or merchandising design

MATERIALS & EQUIPMENT

- 3 x (38") Linky Snowman foil shapes (85106)
- 2 x 46cm (18") Happy Holidays Snowman foil balloons (86106)
- 8 x 30cm (12") LINK-O-LOON®s
- 40 x 12cm (5") rounds
- 8 x 28cm (11") Red Snowflake printed rounds (53393)
- 2 x 260 un-inflated 260s
- 2 heavy bouquet weights
- Helium and air
- 8 x Clik-Clik Adhesive Balloon Tabs
- Conwin Precision Auto-Sizer
- Ultra HI-FLOAT *optional*

(Conwin's Precision Air auto sizes air-filled balloons or the Dual Split Second Sizer precision fills with helium, nitrogen or air for perfect sizing.)

STEP BY STEP

1. Tie a 260 to a heavy bouquet weight. Create a second weight with the same method and set both aside.
2. Air-fill two 28cm (11") printed rounds to 25cm (10") and tie the necks together to form a duplet. Repeat and twist the necks of both duplets together to form a cluster of four. Place the cluster over the weight and tie the 260 to the underside of the cluster. Repeat the process to create a second weighted cluster.
3. Treat three 30cm (12") LINK-O-LOON®s with Ultra HI-FLOAT and helium fill each tying tip to tail to form a short chain. Tie the chain into one of the clusters. Repeat the process to create a second separate weighted cluster and chain.
4. Place a Clik-Clik Adhesive Balloon Tab onto an 46cm (18") foil balloon at the outside edge of the left side and another facing it on the backside lining up the small holes of both. Apply the same treatment on the opposite side of the 46cm (18") foil balloon with two more Adhesive Balloon Tabs and helium fill.
5. Tie the tip of the top LINK-O-LOON® chain into the Adhesive Hang Tab holes on one side of the foil balloon. Repeat with a second 46cm (18") foil and attach in the same way to the second LINK-O-LOON® chain.
6. Treat a single 30cm (12") LINK-O-LOON® with Ultra HI-FLOAT and fill with helium. Tie the neck onto the Adhesive Hang Tab on the opposite side of the foil balloon to make a longer chain of balloons. Using the same technique, add a single LINK-O-LOON® to the second chain.
7. Helium fill three Linky Snowman foils and link their hands together. Join the two chains to each side by tying the tips of the top LINK-O-LOON® chains joining them into an arch formation.
8. Create 10 air filled 12cm (5") clusters sized to 10cm (4") and place them onto the joined balloons as shown to cover the knots.

CONCLUSION

This design is fast to assemble and with Ultra HI-FLOAT in the 30cm (12") LINK-O-LOON®, is a very long lasting design. By changing colors, foil patterns and choosing from a large selection of Linky foils, this design works well for a variety of themes and seasons.

Linky Ladybug	
35" Helium Shape	85010
Linky Bugs	
11" All-Over Printed Latex	53510
Linky Bugs Birthday	
18" Foil	86029
